

What is the best way to preserve biodiversity and secure the future of endangered orangutans? Sort the cards into 2 groups., things that are **Threats to biodiversity** and things that are **opportunities to preserve biodiversity**.

Some parts of Borneo are conservation areas where no logging or hunting are permitted.

Some local people have been trained to work in forest conservation .

Breed orangutans in zoos around the world.

Whilst a lot of timber is exported, the demand in Indonesia for domestic timber exceeds the legal limit for logging.

Palm oil, grown on drained peat is used as biofuel to reduce fossil fuel use in developed countries.

Rescue centres have been set up to raise orphan orangutans and return them to the wild.

Areas which were deforested have been planted with oil palms .

Logging companies employ armed guards.

Palm oil is used as a healthy oil in 1 in 10 supermarket products.

Laws can be made in consumer countries against imports of illegally harvested timber.

Young orangutans are captured and sold abroad.

Fires set to clear forest illegally have spread across Borneo as the peat swamps have dried out
