**Skimming and scanning a Spanish text for key points**

**Using images as a prompt for speaking**

**Using a glossary / dictionary- Listening for key points**

**Translation from Spanish into English and English into Spanish**

**Revision of basic environment vocabulary**

**Higher level reading testing comprehension skills**

### Lesson: Clean Water 2 of 2

## GLOBAL LEARNING OUTCOMES

#### CLEAN WATER AND SANITATION

Students understand that that piped water and sanitation are not available to all of the world's population

Students can identify the global disparities in water usage and access

Students can name some consequences of people not having access to clean water and sanitation

**SMSC:** Ability to be reflective about their own beliefs and perspective on life, investigating and offering reasoned views about moral and ethical issues.

**British Values:** Mutual respect and tolerance of different beliefs, individual liberty.

## Action

Try swapping a beef burger for a plant-based burger. This will save an average of 90 gallons of water each time. It will use 87% less water and cuts water contamination by 92%. The production of animal products (meat and dairy in particular) is highly water-intensive. The size and characteristics of the water footprint will vary across animal types and production systems. Generally, animal products have a far larger footprint per calorie than crop products.
