Dictionaries at the discretion of the teacher

CURRICULUM OUTCOMES

Skimming and scanning a Spanish text for key points

Using images as a prompt for speaking

Using a glossary / dictionary

Listening for key points

Translation from Spanish into English and English into Spanish

Revision of basic environment vocabulary

Higher level reading testing comprehension skills

Lesson: Life Under Water 2 of 2

GLOBAL LEARNING OUTCOMES

LIFE
BELOW WATER

Students understand that life below water is threatened and can name some threats to life below water

Students can name causes for plastic pollution in the ocean

Students are able to give an opinion about the threats to life below water and name some actions to address them (local, national, or global)

SMSC: Ability to be reflective about their own beliefs and perspective on life, investigating and offering reasoned views about moral and ethical issues.

British Values: Mutual respect and tolerance of different beliefs, individual liberty.

Action

You can help by trying to minimise plastic on your weekly food shop.

In Britain alone, supermarkets produce an incredible 59 billion pieces of plastic packaging a year.

Do your best to not contribute to this figure, by choosing non-packaged fruit and vegetables, and searching for food that is wrapped in more eco-friendly material such as cardboard. You could also take the next step and find your nearest zero-waste store when your household next needs a top-up of dry ingredients such as pasta, rice, or spices.
